Skill Point™ System

Guidance at the point of need.

Deliver procedures, checklists, training, and critical documents exactly where work happens.

The Skill Point™ System transforms assets, equipment, and workspaces into secure digital access points for operational guidance, training, and controlled content delivery. Built for industrial and commercial applications, the platform enables organizations to deliver procedures, checklists, training, and critical documents directly where work is performed. With centralized content management, role-based access, and support for mobile, tablet, and desktop environments, the Skill Point™ System helps organizations deliver the right guidance where work happens.

Features

- » **QR access to digital assets at point of use**
- » **Procedures, checklists, training, and documents (file-agnostic)**
- » **Role-based content access**
- » **Centralized CMS with dynamic updates (no QR replacement needed)**
- » **Mobile, tablet, and desktop compatible**
- » **Online and offline functionality**
- » **Supports LOTO and controlled workflows**
- » **Usage and access analytics**

Skill Point™ System Helps

OPERATORS

- » Access the right procedures, checklists, training, and documents exactly where work happens
- » Get the guidance needed to perform tasks safely, efficiently, and consistently
- » Spend less time searching and more time executing

SUPERVISORS

- » Standardize how work is performed across teams and shifts
- » Reinforce LOTO, inspections, training, and other controlled workflows
- » Improve visibility, consistency, and accountability in the field

ADMINISTRATORS

- » Manage content centrally and update it without reworking field documents
- » Control who sees what based on roles and organizational needs
- » Scale governed content delivery across assets, work areas, and operations
