HOW S2RC DROVE ZERO INCIDENTS IN 90 DAYS

Delivering Proven Safety Results, Not Just Promises.

EXECUTIVE SUMMARY

In just 90 days, S2RC helped a client log 35,075 hours with zero recordable injuries, zero major incidents, & a TRIR of 0. While delivering those results, S2RC completed 130 compliance audits, earned A ratings in ISNetWorld and Ariba Sourcing, & trained 51 employees through 13 multilingual safety sessions. The outcome was not theoretical improvement. It was measurable operational control, stronger compliance, & a 93% average safety score by the end of Q1 2026.

THE CLIENT PROBLEM

The client did not need more safety language. The client needed control.

When S2RC was integrated as a **fractional safety partner on January 1, 2026**, the operation needed stronger compliance oversight, more consistent workforce training, & tighter field accountability. The gap was not policy. The gap was execution.

Like many organizations, the client had safety activity, but not yet a repeatable performance system. Audits, training, & oversight needed to produce visible operational results.

WHAT S2RC DID

S2RC implemented a fractional safety model built to create immediate discipline & measurable performance.

✓ Embedded Safety Leadership

S2RC integrated into the client's operation to strengthen accountability, reinforce safe work practices, & establish a more consistent safety rhythm.

✓ High-Tempo Compliance Execution

From **January 1, 2026 to March 31, 2026**, S2RC completed **130 compliance audits**, creating a steady cadence of observation, correction, & follow-up.

✓ Multilingual Workforce Training

Starting in **January 2026**, S2RC launched recurring annual safety training every Friday. Across **13 sessions**, S2RC trained **51 employees** in **English & Spanish**, with attendance tracking & post-training evaluations maintained.

THE RESULTS

Between January 1 and March 31, 2026, the client logged **35,075 hours worked** and achieved:

0
Recordable injuries

0
Major incidents, including traffic

0
TRIR

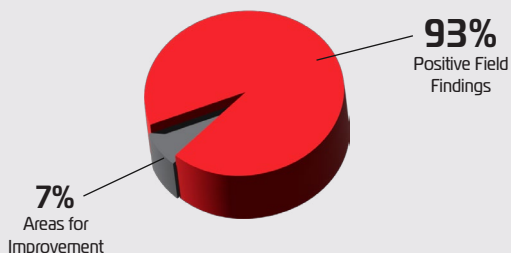

INCIDENT METRICS

- » Total events: **2** (*nonrecordable first aid injuries*)
- » Event rate: **11.41** per 200,000 hours
- » Hours per event: 17,537.5

This was not a paperwork win. It was operational performance under real working conditions.

SAFETY PERFORMANCE TREND

S2RC's impact was not limited to incident counts. Safety scoring across the quarter remained strong:

The result was not a one-time spike. It was sustained performance with measurable recovery & improvement by March.

BUSINESS IMPACT

In 90 days, S2RC helped the client:

- » Reduce recordable incident exposure to zero.
- » Eliminate major incidents during the reporting period.
- » Improve audit readiness & compliance credibility.
- » Train a multilingual workforce with documented attendance & evaluations.
- » Establish a more disciplined, repeatable safety operating rhythm.
- » Produce measurable data that supports future client, insurer, & compliance conversations.

VALUE PROPOSITION

S2RC did not sell safety theater. S2RC produced control.

The value proposition is simple: a client brought in fractional safety leadership & within one quarter, achieved zero recordables, zero major incidents, A-rated compliance performance, & a 93% average safety score.

CLOSING STATEMENT

After S2RC was embedded as a fractional safety partner on December 1, 2025, the client completed Q1 2026 with:

- » **35,075** hours worked
- » **0** recordable injuries
- » **0** major incidents
- » TRIR of **0**
- » **130** compliance audits completed
- » **51** employees trained
- » **13** multiingual safety sessions delivered

**90 DAYS. ZERO RECORDABLES.
ZERO MAJOR INCIDENTS.**
